

## Planning and Refinement

<b>Question:</b>	<b>What essential maintenance is required of a road bicycle for optimum enjoyment and performance?</b>			
<b>Focus Questions:</b>	How do different people use their road bicycles for enjoyment?	What are the use requirements for different types of road bicycles?	What tools and techniques are needed to maintain a bicycle?	What parts are likely to require repair or maintenance and how are these best maintained?
<b>Research Processes:</b>	Survey Interviews Bicycle SA websites Bicycle Associations	Websites Survey Youtube videos	Interview Bike Shop owners Tools websites You tube videos	Survey Interview Bike Shop Owner Websites Bicycle manuals Maintaining my own road bikes.
<b>Rationale / Comment:</b>	Depending on how a bicycle is used will affect performance. This research will help find how bikes are mostly used in South Australia.	Rather than focusing on every part of bike maintenance , I will find out how road bikes are used and what is likely to wear most often.	I will then be able to learn and then demonstrate the best way to fix different parts to a ride bike.	In order to find out the best way to maintain a bike,
<b>Capability/ies: Personal and Social</b>	Interviewing people and contacting Bike SA will help me develop my Personal and Social capability. I will learn how people ride their road bikes, and what's importance for my fixing my bike.	I will network with different people who share a similar interest to me on road bikes and cycling.	I will develop confidence and contacts with people in the industry.	I will learn some new skills and knowledge, and when I need to fix my own bicycle I will know what I should fix first.
<b>Possible Key Finding/s:</b>	This research will focus on the basic maintenance required most commonly.	Where people most people ride their bikes and what wear if likely to occur most often.	This focus will only focus on the 'essential' items for maintained and be featured in a video outcome.	I will be able to learn and demonstrate the essential things that need to be repaired on a bike and best way to do the repairs.
