

Using Word for Referencing

Open the **References** Tab.

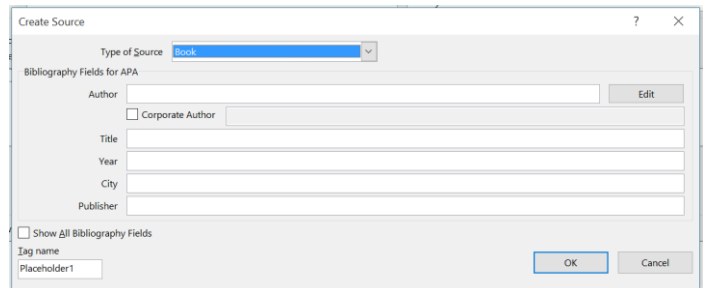

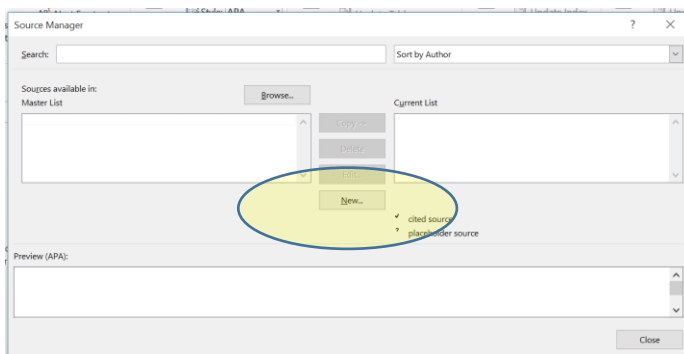

To add Reference sources, click **Manage Sources**.

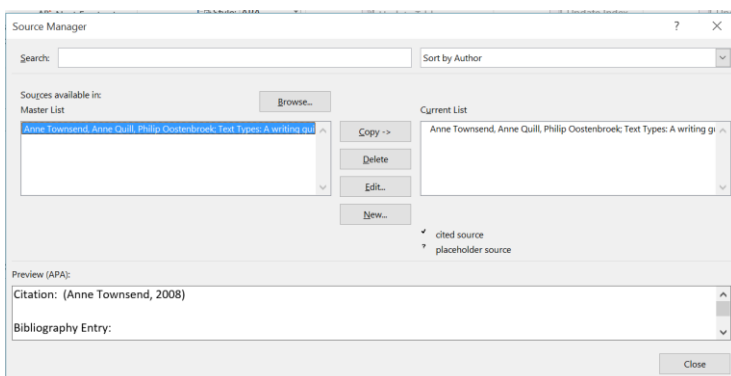

Click **New**.

Add your reference information.

This reference will be added to a **Master List** (that is stored on your computer) and a **Current List** (that is used in the current document).

To build your bibliography:

Choose the appropriate Reference sources from the Master list to include in your Current List.

Add a source...

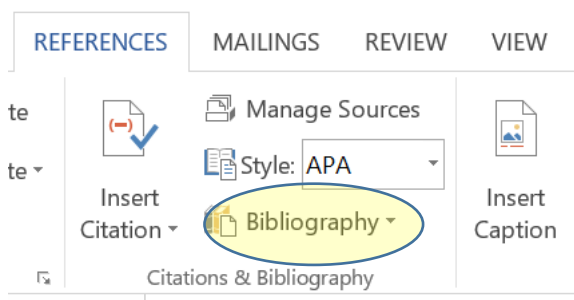

If the source does not already appear in your Current List, select the source in the Master List and click the **Copy** button.

Remove a source...

If you need to remove a source from your Current List, select the source in the Current List and click the **Delete** button.

Source details may be edited by clicking on the **Edit** button.

At the end of your document, click **Bibliography**.

Select **Bibliography** format.

The sources in the Current List will appear.

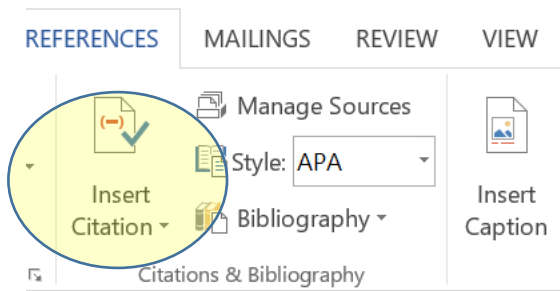

[Bibliography](#)

Anne Townsend, A. Q. (2008). *Text Types: A writing guide for students*. Wilston: FarrBooks.

To acknowledge your source with an in-text citation:

Open the **References** Tab.

Click **Insert Citation**.

Select the appropriate source from the list that appears.
